Console Messages ESY2150I - ESY2159W

Note: All console messages prefixed with ESY2 are valid for BS2000/OSD only.

Message	Explanation	Action
ESY2150I Empty TRACE file. No valid buffer elements found.	The TRACE environment is established. There are no valid data in the TRACE wraparound buffer. Therefore, nothing can be saved to file. This message appears if TRACE environment has been established with startup parameter 'TRACE=PREP' without changing its value in this ESY run.	No action required.
ESY2151W TRACE not prepared. Input ignored.	This warning appears if operator wants to change the value of TRACE but the TRACE environment has not been established with 'TRACE=PREP' or 'TRACE=YES'.	If the TRACE feature is requested, startup paarameter 'TRACE=NO' must be changed to a different value.
ESY2152E PROCESS ABEND CODE :1: PSW :2:.	The normal processing of EVENTING or SERVER task has been interrupted to handle a fatal error (STXIT event class ABEND, ERROR, PROCHK). :1: contains the BS2000/OSD interrupt weight. :2: specifies the interrupt address. This is the first message of an information block reporting the status of the task at time of abnormal interruption.	Send all diagnostic data (task output files, dump, startup parameter file, TRACE file, command log) to Software AG support.
ESY2153E :1:.	This message is part of an information block reporting the values of the general purpose registers at time of abnormal interruption.	Send all diagnostic data (task output files, dump, startup parameter file, TRACE file, command log) to Software AG support.
ESY2154E RUNOUT condition detected.	The normal processing of EVENTING or SERVER task has been interrupted due to elapsed CPU time limit. The task will terminate.	Change the task parameters to unlimited CPU time usage.
ESY2155E STACK FAILURE in function :1:.	The internal stack is corrupted. :1: identifies the failed function. Server terminates abnormally.	Please contact Software AG.
ESY2156E NATURAL-SUB-TASK :1: still active.	Shutdown of Natural subtask was requested but it has not stopped yet. The activity check is repeated periodically until all tasks are down.	No action required.
ESY2157E Internal error during CHECK of NATURAL-SUB-TASK.	An internal error has occurred during CHECK of a Natural subtask.	Please contact Software AG.
ESY2158E DEFINE CONSOLE EVENT failed with RC :1:.	The EVENTING task tried to create an event to handle blocked CONSOLE view requests. This call has returned an error code :1:.	Please contact Software AG.
ESY2159W Function :1: received invalid POST code :2:. Request ignored.	Invalid data has been exchanged between the Entire System Server tasks. The receiving function :1: was not able to determine the requested code.	Please contact Software AG.
